1. Benefit for Thailand

Quality improvement of Weft Distortion ➡ Benefit UP

<Present Condition>

Quality of weft distortion is NOT so good after process of fabric.
That will cause re-process many times and benefit will be decreasing.

<How to solve it>

Investment of Weft Straightener

Improve Quality of Weft Distortion

No re-process

Improve customer satisfaction

Sales UP

Benefit UP

2.Selling point(About our technology)

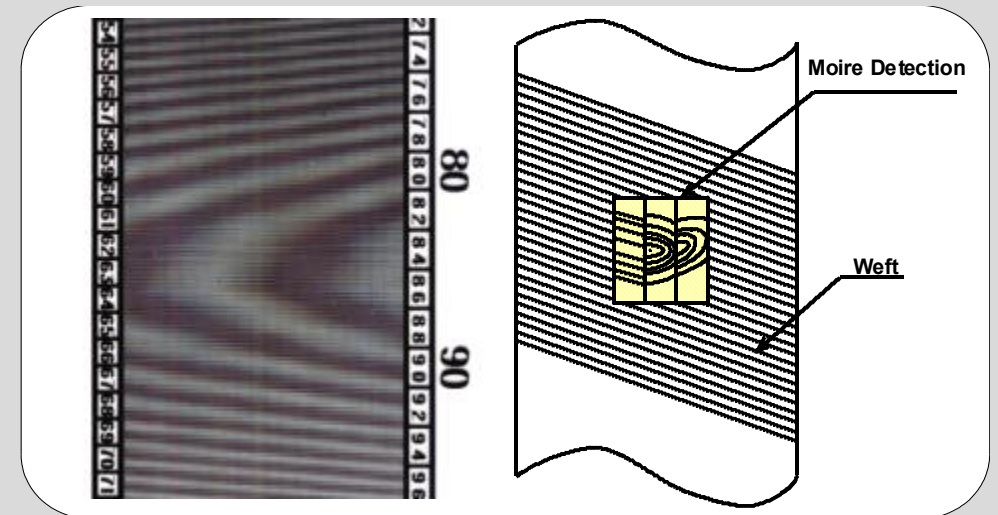

DENSIMATIC (Weft Straightener) adopts sensor (with Moire Detection) which is only technology in the world.

DENSIMATIC (Weft Straightener) detects the direction of weft distortions, and rectifies the weft distortions automatically by passing the fabric to Skew Roll and Bow Roll which is swinging.

SOLD OVER 3000 UNIT

Standard
adoption

Moire Detection
(ONLY ONE TECHNOLOGY in the world)

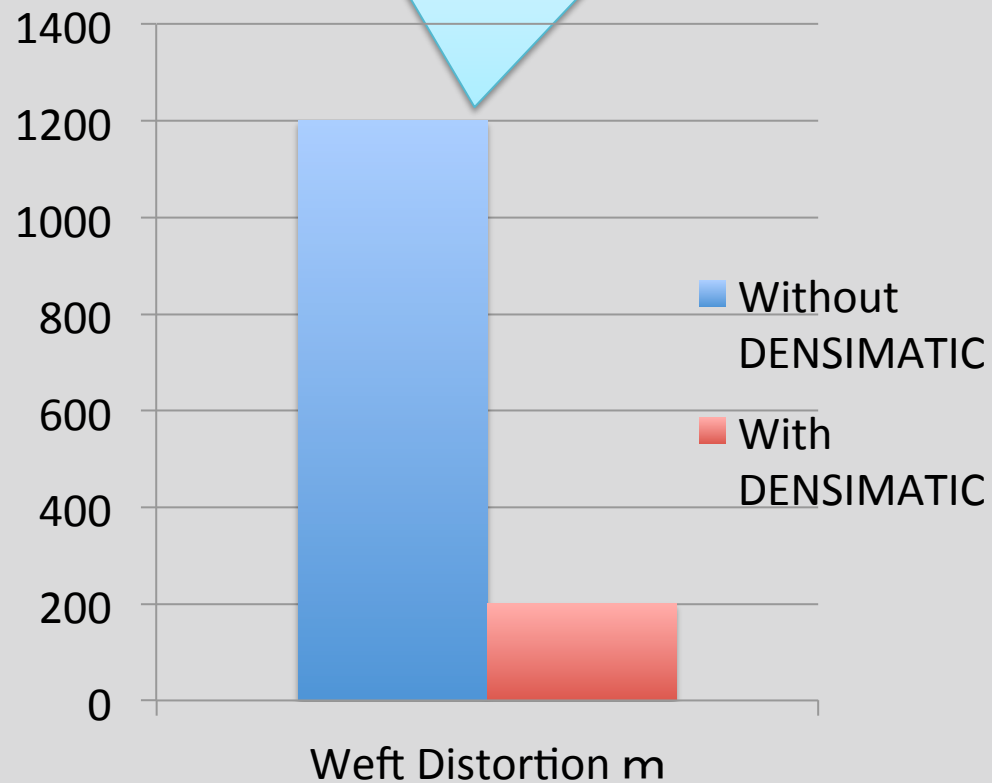

OTAGAI

Effective

OTAGAI Forum Association

Improvement 83%

Company S Factory Loss

DENSIMATIC[®] example case

☆ Reduce the financial loss of JPY500,000.- in one month by DENSIMATIC !
It means JPY6,000,000.- of deficit can be saved.

☆ Depreciation is possible in one year.

3. OTAGAI point(How to realize it)

Counseling on the spot (Business Meeting, Confirm condition on the spot)

Proposal of machine (Quotation)

Negotiation (T / T or L / C)

Install the machine

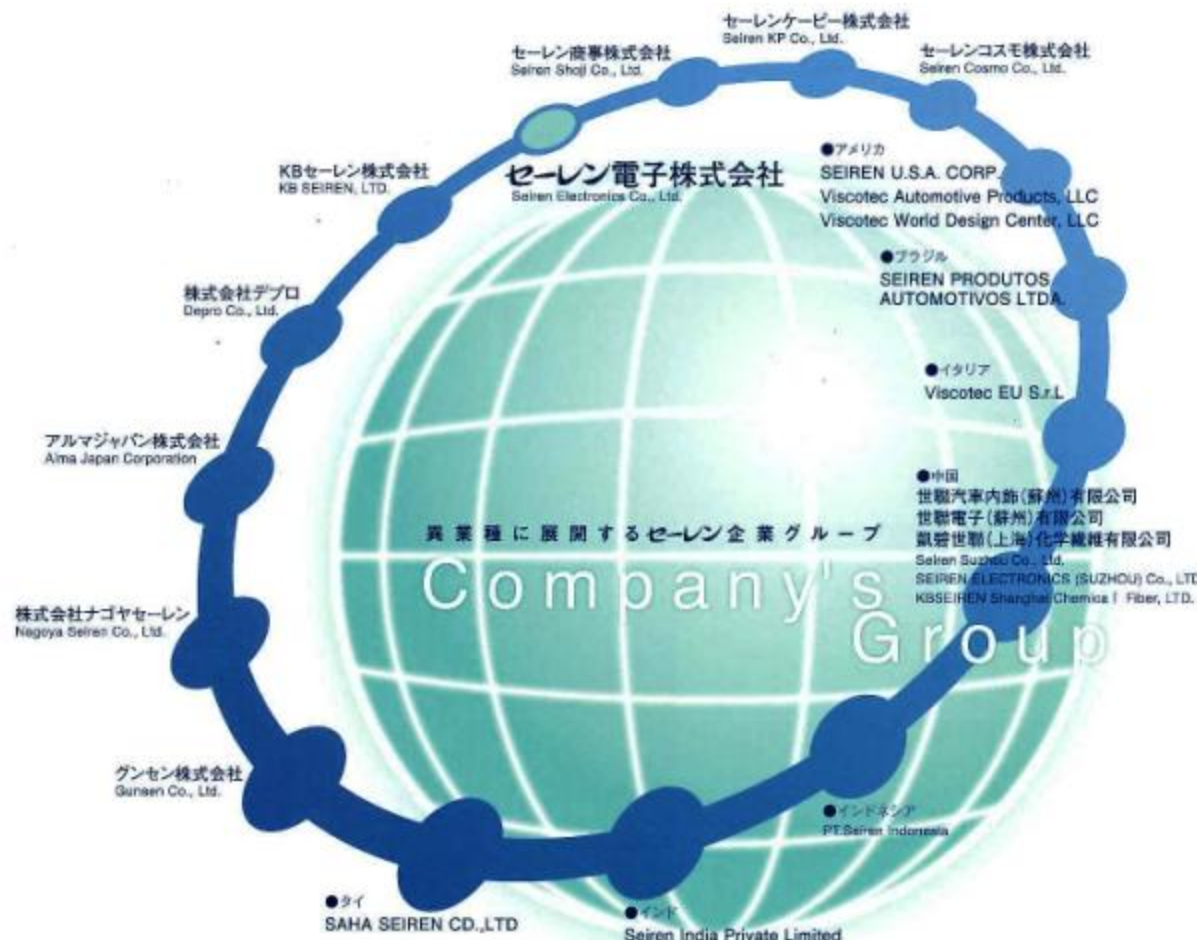

Regular maintenance (After-service by Japanese engineer at site)
