

Japan's Knowhow, Develop in Thailand, to AEC Markets

To support best friend of Thailand,
Japan's enterprises, by the same level of
Thailand's enterprises.

O T A G A I

OTAGAI Forum Association

12th February, 2016

Japan AMC's president and Bangkok
AMC's Chairman
Mr.Yasuo Yamaguchi

1. Benefit for Thailand

- Bring Thailand to be the manufacturing technology center of S.E.A.
- By Japan's spirit of "Mono-zukuri", Thailand's companies and employees will be trained to be the same "quality mind" with Japanese.
- From the same sight and thinking with Japanese, Thailand's level will be brought to the highest level of "quality" and "technology" in S.E.A., the most highest value added will be born and serve value added products to S.E.A.
- By Higher value added products and services, Thai people will get higher income, make the education to be more higher, and finally, Thai social will become "middle class population country", same with Japan.
- With "middle class population", almost the social problems will be solved by itself.

2.Selling point

■ AMC Group companies are composed of “Challenge Spirit”

Together with Thai social and customers, we started from small business and jump into customer needs, grow together with customers.

Our business tried to “response” all the customer requests by no answer of “cannot”, but tried to find the best choice to offer customer.

3. OTAGAI point

■ Thai Political plan/Education/Research data/Trading companies “must” cooperate in the same direction.

- Political plan, officers must cooperate and support us, not as “foreign enterprises”, but as “Thailand enterprise”. Eliminate such Working VISA to give a chance for immigration to ask “undertable” because of “foreigners”.
- Education level and new generation disciplines and thinking. Must change the thinking of “do less, get much”, “thinking only incoming before skill”
- Gain more researches, any data from researches will back up the technology and development in Thailand.
- Trading companies must share any data in S.E.A., needs and also the lack of technology

4. Summarize

1. We are co-operating to bring Thailand to be the technology center of ASEAN
2. The special property which our factory proud is, how to educate the potential employee to be skillful person. Educate to understand how to control the quality, how to make the product to satisfy customer's need, and how to use technology to improve the product. Educate Thai's employee to be technician to support the technologies in ASEAN is the thing which our company can.
3. For Thailand's company, we are educating and aiming to bring Thai's company to be the Technical central company. Developing human power by training at Japan, and also send to learn new-coming technology.

5. Company Information

Name **BANGKOK-AMC**

■ Factory space = 2,500 sq.m.

Address 73 Moo.5 Wat Nhongmuangmai,
T.Nongkhayat, A.Panutnikhom, Chonburi

Established ■ 2nd Feb.,2006

Represent Chitsakon Pakjamsai

Investment 190,000,000THB

Products High pressure parts, fittings, hydraulic parts manufacturing and sales
Automobile parts manufacturing, brake fittings and air fittings
